Re: Permission to operate the Kentuck Solar Site

Dear Austin:

Please accept this letter as the City of Danville-Department of Utilities permission to operate the Kentuck Solar site. The City's electric staff has confirmed that the service line is ready to accept generation on Monday March 19, 2018. Please call Kevin Hyler, Electric Engineer, or myself for any assistance during the commissioning phase. The City is excited to start receiving generation from the solar site. It has been a pleasure working with McCarthy, Sol Systems, and looking forward to long relationship at the site with Washington Gas and Light.

Best Regards,

Jason Grey
Director of Utilities

CC: Greg Disher, Director of Power and Light
